ADIKARI WISESA INDONESIA CONDUCTS MANAGEMENT WALK THROUGH WITH PERTAMINA HULU MAHAKAM

Balikpapan, September 2026 — Adikari Wisesa Indonesia conducted a Management Walk Through (MWT) with Pertamina Hulu Mahakam (PHM) as part of its commitment to strengthening communication, coordination, and awareness of safety, operational excellence, and reliability in the workplace.

The MWT was conducted in a hybrid format, combining on-site engagement with online participation. This approach provided management with an opportunity to gain a closer understanding of worksite conditions, engage in discussions with project personnel, and identify potential improvements in work execution.

Strengthening Communication and Identifying Potential Improvements

The Management Walk Through is one way for management to gain a better understanding of actual working conditions in the field. Through direct engagement with the team, management can develop a more comprehensive understanding of work processes, operational challenges, and key areas that require attention to ensure safe and effective work execution.

Beyond serving as a monitoring activity, the MWT also encourages two-way communication between management and project personnel. Open discussions help identify potential improvements and strengthen coordination in addressing various challenges in the workplace.

Personnel Care as Part of Safety Culture

At Adikari Wisesa Indonesia, operational success goes beyond achieving work targets. It also means ensuring personnel safety, readiness, and well-being.

Through the MWT, management engages directly with project personnel to understand their needs and challenges while strengthening open communication, collaboration, and safety awareness.

Advancing Safety, Operational Excellence, and Reliability

The MWT with Pertamina Hulu Mahakam reflects Adikari Wisesa Indonesia's commitment to improving work execution through effective communication, strong coordination, and a focus on safety and operational reliability.

We extend our appreciation to Pertamina Hulu Mahakam for its trust and collaboration in supporting a safe, productive, and sustainable working environment.

Strong Collaboration for Sustainable Progress.
