ADIKARI WISESA INDONESIA CONDUCTS RCM AND RCS TRAINING & WORKSHOP WITH PERTAMINA HULU MAHAKAM

Balikpapan, 28 September – 2 October 2026 – PT Adikari Wisesa Indonesia, in collaboration with Pertamina Hulu Mahakam (PHM), conducted an integrated Training & Workshop on Reliability Centered Maintenance (RCM) and Reliability Centered Spares (RCS) in Balikpapan.

The five-day program aimed to enhance participants' competencies in developing effective maintenance strategies and optimizing spare parts management to support improved asset reliability, operational excellence, and operational efficiency.

Optimizing Maintenance Strategies Through RCM

The Reliability Centered Maintenance (RCM) session focused on identifying potential equipment failures and developing maintenance strategies based on asset functions, operating conditions, and failure consequences.

The discussions covered the determination of appropriate maintenance tasks and intervals, particularly for high-criticality equipment. This approach is expected to help reduce repetitive failures and improve the effectiveness of existing maintenance programs.

Improving Spare Parts Management Through RCS

The Reliability Centered Spares (RCS) session focused on assessing spare parts criticality based on operational risks, stockout consequences, and facility requirements.

Participants also explored inventory management strategies, including routine spares, strategic spares, and just-in-time approaches, to ensure optimal spare parts availability while considering equipment reliability and inventory cost efficiency.

Strengthening Competencies and Operational Reliability

The integration of RCM and RCS provides a comprehensive understanding of the relationship between maintenance strategies and spare parts management in supporting asset reliability.

Through this program, Adikari Wisesa Indonesia and Pertamina Hulu Mahakam demonstrate their shared commitment to developing competencies and implementing more structured, effective, and sustainable asset management strategies.

Adikari Wisesa Indonesia extends its appreciation to Pertamina Hulu Mahakam for the trust and collaboration throughout the Training & Workshop program.
